

RCMS

Ring Convergence Measurement System

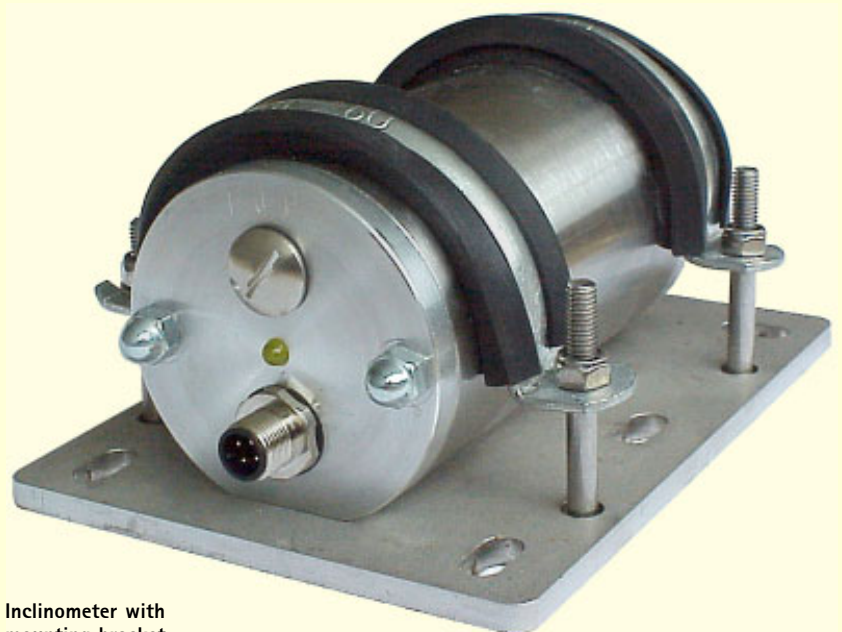

High - Performance Measurement System based
on a polygonal arrangement of Chained Inclinometers

System Features

- Quick and easy installation of individual components (inclinometers and data cables)
- Rugged IP68 Cases for the inclinometers
- Small Form of cases facilitate their safe installation at bolt pockets or other available holes and corners
- Short time requirements for installation, immediately after completing ring build
- Minimum personnel cost, thanks to fully automatic data recording
- User Defineable time intervals, down to every 5 secs.
- Easy Data Processing of All Stored Data Sets
- Flexible Selection of Required Convergence Diameters
- Significant Accuracy of approx. 2mm
