Pipe jacking machinery

M+S, as representative of [Herrenknecht](#) in Spain, can offer a full range of machinery for pipe jacking.

In this section of our web page we offer a short description of [the pipe jacking technology](#). With more detail we described almost all range of the pipe jacking equipment that we offer. The most important pipe jacking equipment that Herrenknecht offer are:

Microtunnelling machines:

For drilling under rock, with groundwater, in clays, gravel, etc. We can offer, from DN200 to DN4000, any kind of microtunnelling machines.

Excavators open shield:

For the pipe jacking in sand, argillaceous land or with loose gravel. The excavators open shields are most suitable and easy to work with.

Roadheaders open shield:

They are a simple solution and robust for the pipe jacking in soft rock and compact clay up to 70 MPa. We have open shields that allow to change the arm of a roadheader by an excavator.
