HERRENKNECHT AG

Herrenknecht AG was founded on 1978 by Dr. Ing. Martin Herrenknecht being nowadays technology leader in mechanical tunnelling.

Herrenknecht has the knowledge and experience to implement tunnel and pipeline projects from the planning through to the successful breakthrough. It is the only supplier in the world which develops, produces and sells the entire range of [mechanical tunnelling machines](#).

The prestige that enjoys Germany in the production of machinery is due to the reliability, flexibility in the project development and quality of production. Herrenknecht follows rigorously this tradition. A rational design, performance capability, work and production organisation, jobsite service, machine installation and a perfect transport organisation, make sure a development free of obstacles. In that way, our clients all over the world receive an exclusive attention.
