BOHRTEC

With more than fifteen years experience in design, construction and operation of machinery for the trenchless construction of small sewers and house connections, Bohrtec (Germany) is now a leading supplier of [equipment in auger drills](#)

More than 200 Kilometres, 124 miles of small diameter tunnelling have been successful constructed, demonstrating the superior power and quality of the Bohrtec auger bore equipment.

The machinery is of rugged construction and has been designed to meet practical needs. A full range of accessories is available including various types of drill heads to accommodate different ground conditions. Hammer drills for rock conditions and the Bohrtec flexible seal adapter for watertight connections to the main collector as well as a Patented design for the "Water Auger" to allow operation below the water table make Bohrtec the right choice for your application.

For any question related to the [Bohrtec auger bore equipment](#) or the process engineering you can contact me or the main office of Bohrtec in Germany.
